Dear Hiring Manager:

I am interested in applying for the Hong Kong Science and Technology Parks Corporation Internship. As I am pursuing a bachelor's degree in Computing and AI at Hong Kong Polytechnic University, I am well equipped to apply for this internship due to my teamwork, communication skills and experience in a working environment.

Being a recent PLKCKY graduate, which follows the IB diploma, equipped me with many interdisciplinary skills, such as problem-solving and critical thinking. In addition, I was very eager to learn about technological advancements and how to use them. Learning in IB caused me to become a leader for the STEM Team, allowing me to approach new and emerging technologies, such as AI and ML, through activities there, in addition to the underlying mathematics and concepts beneath it and using them in real-life applications.

In addition, I was also a part of the School Cafe for more than six years, being a manager for more than four years, enhancing my communication and leadership skills. Having been in the School Cafe for a long time, I am experienced working in a team. In addition, I solved many problems and difficulties as a manager, such as employees not showing up to work and issues with contacting suppliers. It has allowed me to learn about how to prevent these problems from starting in the first place.

In conclusion, I am well equipped to be an intern in your company as I am a critical inquirer, eager to learn about new technologies and have wide and varied skills.

I am very excited about this opportunity to bring these skills to you and learn about cutting-edge technologies that are developing worldwide, contributing to your work.

Thank you for considering my application, and I look forward to your reply.

Sincerely,
Siu Yau Shing
